

# System Monitoring

## Page Contents

- 1 [Server Information](#)
- 2 [OSGI Bundle Information](#)
- 3 [Memory Management](#)
- 4 [TBL Log](#)

## Server Information

Information about the copy of Enterprise Data Governance being used and the system on which it is running.

## OSGI Bundle Information

A list of the Open Services Gateway Initiative (OSGI) bundles (Eclipse plugins) in use and their release numbers.

## Memory Management

A detailed report on current memory usage. The report includes a link that lets you request garbage collection to clean up the memory.

## TBL Log

Accesses the TopBraid error log, including warnings and errors from the Web application container (for example, Tomcat).
